## 「Z世代の学生理解と研究指導の構築」

近年の学生は「Z世代」と称され、学生気質の変化が指摘される一方で、学生像の多様化も進んでいます。研究室運営や学生指導は授業とは異なり、教員と学生の関係が密になるため、認識のギャップなどから指導に難しさを感じる教職員も少なくありません。さらに、大学生・大学院生のメンタルヘルス課題への対応の必要性も高まっています。こうした状況を踏まえ、今回のFD研修会では、現在の学生理解を起点に、メンタルヘルス、対人関係、権利意識、学生への関わり方、研究室運営・指導体制の構築、キャンパスライフ・健康支援センターの取り組みおよび教職員向け支援サイトの活用方法を包括的に取り上げ、実践に役立つ視点と情報を共有します。

Faculty Development Workshop at the Faculty of Agriculture

"Understanding Generation Z Students and Building Research Guidance"

In recent years, students have been referred to as "Generation Z," and while changes in student temperament have been noted, the diversity of student profiles is also increasing. Unlike classroom teaching, laboratory management and student supervision involve closer relationships between faculty and students, which can lead to difficulties in guidance due to recognition gaps. Furthermore, the need to address mental health issues among undergraduate and graduate students is growing. In light of these circumstances, this FD training session will start with an understanding of today's students and comprehensively cover topics such as mental health, interpersonal relationships, awareness of rights, approaches to student engagement, building research supervision systems, initiatives by the Campus Life and Health Support Center, and how to utilize support sites for faculty and staff. The goal is to share practical perspectives and information useful for implementation.
