

Boosting Your KAKENHI Success Rate

All about the grant system and Kyushu University's Support Program

This FDE will present an overview of research funding prospects in Japan and at Kyushu University, keeping in mind the need to increase external funding as a research university.

The FDE will concentrate on the KAKENHI system in particular, and briefly introduce the application system before taking a close look at the support system offered by Kyushu University. We will reflect on the analysis of past KAKENHI outcomes and the impact of the Kyushu University Proposal Review Support Program. We will also provide advice on how to raise the success rate of future KAKENHI applications.
